

Accredited Social Value Software

Compliance Chain's Social Value Software is accredited by Social Value International and the Institute for Social Value, providing organisations with a credible, robust and transparent solution for planning, measuring, evaluating, and reporting their social value, and impact.

Plan

Forecast & create social value delivery plans & KPIs with ease

Manage

Track commitments, activities & suppliers in one central place

Measure

Capture outputs, outcomes & evidence in real time

Assure

Ensure data quality with advice & guidance, credible methodology, audit trails & governance

Report

Produce automated reports & dashboards that demonstrate impact

Core Software Capabilities

Project & Delivery Planning

Create Social Value Delivery Plans, define commitments, KPIs, targets & responsibilities before delivery begins.

Performance Dashboards

Real-time dashboards showing commitments, outputs, outcomes, KPIs, financial value & programme performance.

Commitment Management

Manage contractual commitments, activities & outputs in a single location with complete visibility across projects.

Contract & Portfolio Reporting

Generate automated reports for clients, contractors & stakeholders at project, contract or portfolio level.

Evidence & Assurance

Upload, validate & approve evidence through structured workflows, creating a fully auditable evidence trail.

Supply Chain Engagement

Provide contractors & suppliers with controlled access to record activities, upload evidence & monitor performance.

Impact Measurement & Valuation

Measure outcomes & monetise social value using accredited methodologies aligned with HM Treasury Green Book principles.

Governance & Compliance

Role-based permissions, audit trails, workflow approvals & document management to support governance & assurance.

Why Does the Accreditation Matter?

Independent credibility

Provides external recognition that the software aligns with established social value principles & standards.

Confidence in measurement

Gives users greater confidence that the software can support credible social value & SROI analysis.

Consistent methodology

Supports a structured & consistent approach to measuring, valuing & reporting social impact.

Robust SROI functionality

Accreditation assesses functionality including Present Value, Net Present Value, SROI ratios & discounting.

Reduces the risk of overclaiming

Aligns with the Principles of Social Value, which include the eight requirements to only claim the value an organisation is responsible for creating.

Transparency

Helps organisations clearly demonstrate how social value has been calculated & the evidence behind reported results.

Greater stakeholder confidence

Provides clients, commissioners & stakeholders with additional assurance that reported social value is underpinned by a recognised methodology.

Internationally recognised principles

Social Value International's standards are designed to support consistent & credible social impact measurement & reporting.

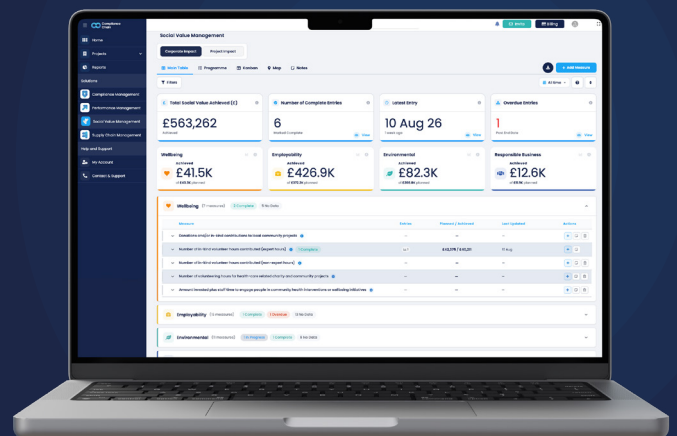

Supports evidence-based decision-making

Measurement is not simply about producing a figure; it helps organisations understand outcomes & use evidence to improve decisions.

Why Choose Compliance Chain

Compliance Chain goes beyond simply counting activities and applying proxy values.

Our accredited software embeds recognised social value principles directly within the software, helping organisations from any sector and size demonstrate not only what they delivered, but what changed, what evidence supports it and what value was genuinely created.
